

Brainwave Adaptive Learning is an effective and affordable way for you to increase HR compliance!

- As a corporate trainer or human resources professional, your mandated training is an ongoing challenge. There's pressure to ensure compliance across your organization with a tight training budget
- Brainwave Adaptive Learning™ is an affordable solution for you to **effectively implement online training and reduce costs!**
- Brain-Computer Interface allows identification of the best learning strategy of your employee in less than one hour
- You have vital information about your employees' learning preferences which will help you provide tailored instructions and increase HR compliance significantly
- We can customize any training for you in no time at all. Want to update your content? No problem! You can add your content easily to our AI based adaptive system. Contact us today to learn more.

HOW IT WORKS?

- The employee puts on the EEG headband
- The alpha, beta and gamma waves are observed and analyzed while the employee is rotated through the content in five different learning strategies
- The Brainiak™ App records the brainwave data in real time
- The Big Data AI software finds the employee's best learning strategy
- The brainwave report is generated and the content is presented in the best learning strategy

Key Benefits:

- Saves you training time and makes your training more cost-effective – big savings!
- Five proven learning styles deliver your course content to help your employee better understand and complete their training
- Full training for instructors and ongoing professional support available
- Automated assessment of competency recorded for all employees
- Custom solutions can be developed for your training needs with subject matter experts
- Changes and content upgrades are easily uploaded
- Complete tech Support Available
